

# LOGITH T

Punjaipugalur, Karur | logithithiru@gmail.com | +91 9962295921 | LinkedIn: linkedin.com/in/logith-t-635294378/ | GitHub: github.com/logith2112

## SUMMARY

---

AI/ML and full-stack engineering student with hands-on experience building end-to-end applications spanning IoT sensor systems, machine learning pipelines, NLP, and responsive web platforms. Skilled in Python, SQL, and modern frameworks including Spring Boot, Angular, and React, with working knowledge of AWS, Azure, and Google Cloud.

## EDUCATION

---

### SRM Institute of Science and Technology, Tiruchirappalli

B.Tech, Computer Science and Engineering (Specialization: Artificial Intelligence & Machine Learning) | CGPA: 7.15

## PROJECTS

---

### AI-Enabled Buoy for Early Pollution & Algal Bloom Detection *(AI + IoT)*

- Designed and developed an AI-powered smart water monitoring system that detects pollution levels and predicts algal bloom formation using real-time environmental sensor data.
- Built an intelligent IoT solution integrating machine learning models, sensor networks, and remote monitoring to provide early environmental alerts and improve water quality management.

### Human Activity Recognition System *(Machine Learning)*

- Developed a machine learning-based human activity recognition system capable of accurately classifying activities such as walking, sitting, standing, and running using sensor data.
- Implemented complete data preprocessing, feature engineering, model training, and performance evaluation to deliver an accurate and scalable activity classification solution.

### NLP-Based Clinical Note Summarization & Coding Assistant *(AI/NLP)*

- Built an intelligent clinical document processing system that automatically summarizes medical notes and assists healthcare professionals with medical coding recommendations.
- Integrated transformer-based NLP models and Named Entity Recognition (NER) to improve clinical documentation efficiency and reduce manual processing time.

### Finance Market – Personal Finance Dashboard *(Web Application)*

- Designed and developed a responsive personal finance dashboard enabling users to track income, expenses, budgets, and financial insights through interactive visualizations.
- Implemented dynamic charts, expense categorization, and financial analytics to provide users with an intuitive money management experience.

### Radiusdia Studio Business Website *(Frontend Development)*

- Designed and developed a professional business website for an architecture and interior design company featuring service pages, project portfolios, and client inquiry management.
- Delivered a modern, responsive web solution focused on brand identity, seamless navigation, and an enhanced user experience for prospective clients.
- Live site: [rithik0808.github.io/radiusdia-studio](https://rithik0808.github.io/radiusdia-studio)

### Personal Developer Portfolio *(AI/ML & Full-Stack)*

- Built a responsive portfolio showcasing AI/ML and full-stack projects, skills, education, and certifications.
- Implemented interactive UI and smooth one-by-one scroll animations for a polished experience.
- Live site: [logith2112.github.io/logith-portfolio](https://logith2112.github.io/logith-portfolio)

## TECHNICAL SKILLS

---

**Languages:** Python, SQL

**Frameworks:** Spring, Spring Boot, Angular, React

**Databases:** PostgreSQL, MongoDB

**Cloud Technologies:** Azure, AWS, Google Cloud Console

**Tools:** Microsoft Office, Tableau

**Soft Skills:** Team Management

**Interests:** Blockchain Technology, Machine Learning, Open Source Contribution

## ACHIEVEMENTS & CERTIFICATIONS

---

- IBM Certificate · Artificial Intelligence
- Coursera · Google Cloud Console
